PDF es ISO

- La especificación PDF 1.7 fue propuesta a principios del 2007 por Adobe a la AIIM para ser norma ISO. Ya fue aprobada como la ISO 32000-1
- Formato standard para documentos:
 - PDF/A: para archivo de largo plazo - ISO 19005
 - PDF/X: para pre-press y digital press - ISO 15930
 - PDF/E: para documentación de ingeniería – Aprobación 2007
- Muy utilizado por gobierno y agencias internacionales
- Especificación oficial de la NARA (U.S. National Archives and Records Administration) para documentos digitales.
- En amplio proceso de adopción en América Latina.

 - PDF/X - Print Publishing
 - PDF/A - Long Term Archiving
 - PDF/E - Engineering (AEC + Building, Manufacturing, and Geospatial)
- Provide guidelines for correct viewer behavior to ensure that files are viewed the same whenever & wherever

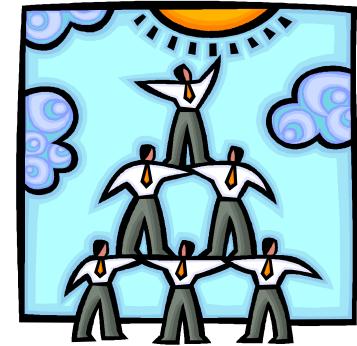

PDF/A

ISO 19005

PDF/A-2

- Remain focused on "static paper" metaphor
 - No interactivity, 3D, multimedia, etc.
- Update to latest PDF standard & current document usage
 - Updated to reference ISO 32000-1
 - Will be the first of the subsets to be based on "ISO PDF"
- Ensure as close to 100% forward compatibility as possible
 - A PDF/A-1 document SHOULD be also a valid PDF/A-2 document
 - However, valid technical changes to ensure long term reliability were preferred over compatibility.
 - Predominantly in the areas of fonts & metadata
 - If your documents don't use the new features of PDF – you keep using PDF/A-1!
- Continue to maintain compatibility with other ISO standards
 - PDF/X-4
 - PDF/E-1

New PDF Features in PDF/A-2

- Improved compression technology/Smaller files
 - JPEG2000
 - Compressed XRefs & Streams (aka "Full Compression")

 - Many views may be stored, but only one at a time can be seen
 - And whatever you view on screen, must print!
- PDF Packages/Collections
 - May only contain other PDF/A documents
- Digital signature enhancements
 - Certified Documents (aka DocMDP Signatures)
 - Improved revocation checking
 - Use of ETSI TS 102778 (aka PAdES) as normative requirement
- Improved tagging/accessibility
 - Including rich support for table-like structures

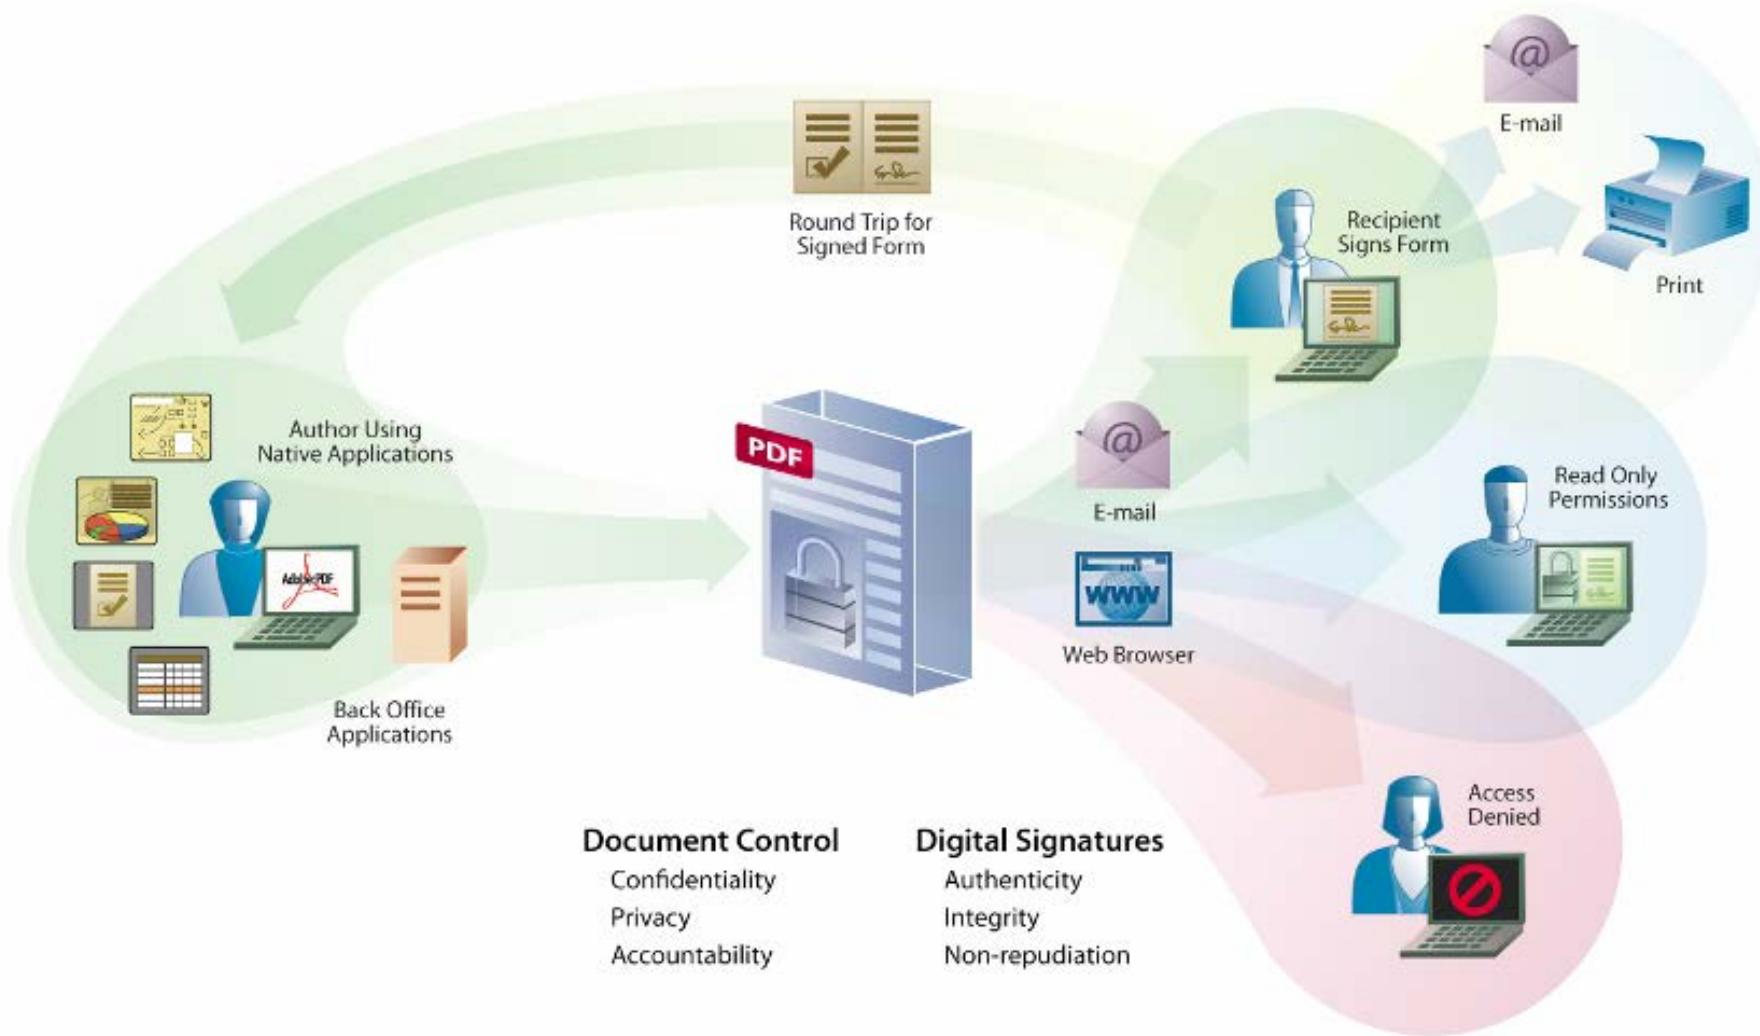

- Attachments & Embedded Files
